

Auto Insurance

by J Mcleod

Auto insurance shields you against financial loss in the event of an accident. Auto insurance is a contract between you and the insurance company in which you pay a premium and are then assured that in the case of an accident the insurance company will cover the necessary costs. Auto insurance offers cover for medical, property and liability.

- Medical coverage can cover the costs of hospital fees, rehabilitation, funeral expenses and lost wages.
- Property coverage will cover the cost of repairs to your vehicle or replacement if the car is not repairable or has been stolen.
- Liability coverage is most important as it covers any legal responsibility you may have to someone one else, if you have injured or damaged them or their property in any way.
- It is always imperative to read the insurance policy very carefully to find out exactly what you are and are not covered for.

When it comes to getting the best deal on insurance shop around online. Here are a few websites to explore.
